

further as to claim 35 in reciting cooperating grooves and lands, as to claim 35 in reciting the packaging advantage, and as to claim 37 in reciting identical structures with alternating grooves and lands arranged to interfit with an opposing interlocking structure when the blade portions are assembled together in angularly offset relation.

The Action suggestion, page 3, that Callahan teaches grooves, that each blade portion in Callahan is identical and that the Callahan interlocking structure comprises the lands and grooves are simply bereft of any support in the reference. Fig. 2 of Callahan has no grooves and lands at least insofar as fastening the wings together is concerned, but relies on pins and holes as noted above. Should this rejection be continued, the Examiner is urged to identify by numeral reference what is being called a groove, a land, etc. in the Action.

CONCLUSION

Reconsideration and allowance of the application, including all of the claims, are requested.

Respectfully Submitted,

Louis J. Bachand, Reg. No. 19726
